◆ Certify

Provider Risk Intelligence That Scales With You

Monitor licenses, exclusions, and sanctions with continuous data checks and proactive alerts—and take action before it affects care delivery or compliance.
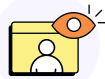

What You're Facing

- Static spreadsheets to track license renewals and DEA expirations
- Missed provider status changes affecting quality and performance
- Scrambling for reports ahead of surveys or audits

Certify Monitoring Delivers

Continuous Surveillance

Tracks licenses, sanctions, board certs, and exclusion data from hundreds of primary sources

Automated Alerts

Continuous notifications for critical provider events

Audit Logs

Instant reporting for CMS, NCQA, URAC, and internal reviews

Credentialing Sync

Send flagged records directly into re-credentialing queues

Tailored For Your Team

Compliance & Medical Staff

One-click audit reports and full visibility into provider status

Network & Ops Leaders

Early detection of DEA expirations, Medicaid terminations, and performance risks

Executives

Transparency into provider risk and a platform to support growth without compromising quality
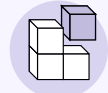

◆ ertify

Message Pillars

Always-On Monitoring
No more batch checks. Stay compliant 24/7

Built-In Risk Controls
Sanctions, exclusions, and license changes caught instantly

Ready for Any Audit
Export logs and alerts in seconds

Scales With Growth
Monitoring built for evolving networks, across regions and specialties

Sample Use Cases

- Eliminate expired DEA risks from your clinical workforce
- Automate board reporting for credentialing and quality committees
- Improve directory and claims accuracy with real-time status syncs
- Centralize monitoring for providers across multiple states and facilities

Don't just verify. Monitor.

About Certify

Certify is the architect of modern provider data infrastructure — combining best-in-class technology, best-in-class data, and deep domain expertise to transform how healthcare operates. Certify now powers the full provider data lifecycle through a continuously updated source of truth powered by thousands of primary sources and available through one API.
