◆ Certify

Keep your network compliant, stronger, and audit-ready

Certify Monitoring automates license, sanction and exclusion checks across hundreds of primary sources so you can mitigate provider risk, stay compliant, and streamline audits—spreadheet free.

What It Solves

- ✓ You're managing delegated entities without real oversight tools
- ✓ Provider sanctions or license changes go unnoticed until it's too late
- ✓ Compliance checks are infrequent, manual, and hard to track
- ✓ Preparing for audits requires cobbling together logs and documents

Certify Monitoring delivers

Real-Time Alerts

Get notified instantly when a provider's license expires, a new sanction is posted, or a board certification is issued.
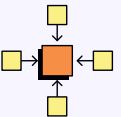

Audit-Ready Oversight

Structured alert histories, change logs, and one-click reporting for NCQA, CMS, and URAC.

Delegation Dashboards

Monitor delegate compliance, upload rosters, and apply rule-based tracking in one place.

Integrated Credentialing Workflows

Route alerts into re-credentialing queues automatically.

Why It Matters

- ⚠ Reduce risk and avoid noncompliance penalties
- Eliminate provider status blind spots
- Cut down audit prep time from weeks to minutes

Certify Monitoring vs. Traditional Tools

Feature	Traditional Monitoring	◈ Certify Monitoring
Check Frequency	Quarterly or annual	Continuous, real-time
Scope	Manual checks	Hundreds of automated sources
Delegate Oversight	None	Configurable rules & dashboards
Audit Prep	Manual, spreadsheet-based	Built-in, exportable logs
Actionability	Alerts buried in emails	Structured feeds with routing

Key Use Cases

Delegation Oversight & Audit Readiness

Network Risk Surveillance

Integrated Credentialing Triggers

Directory and Claims Accuracy

Always on. Always compliant.

About Certify

Certify is the architect of modern provider data infrastructure — combining best-in-class technology, best-in-class data, and deep domain expertise to transform how healthcare operates. Certify now powers the full provider data lifecycle through a continuously updated source of truth powered by thousands of primary sources and available through one API.
